ADDENDUM NO.1

Clarifications:

- C1: Please see the attached mandatory pre-bid sign-in sheet.
- C2: In specifications section 1.01(A), subsection 1(b), the previously stated has changed to the following. The yellow highlighted areas are the changes:
 - 1) The contractor must clean off the parking lot area.
 - Any areas that are within seven (7') feet of existing raised concrete curves, the contractor must mill the previously specified areas so that whenever the new asphalt is installed, the height that the existing raised concrete curves will remain the same as it is now. At the existing asphalt that is against the existing concrete curves, the contractor must mill the thickness of the total of the new asphalt that will be installed and slope the milling back over any areas that are seven (7') from the existing concrete curves.
 - Any areas that are within seven (7') feet of existing concrete storm water drains, the contractor must mill the previously specified areas so that whenever the new asphalt is installed, the slope will still remain to the existing concrete storm drains and will not be a large dip in the parking lot areas. At the existing asphalt that is against the existing concrete storm drains, the contractor must mill the thickness of the total of the new asphalt that will be installed and slope the milling back over any areas that are seven (7') from the existing concrete storm drains.
 - 4) The contractor must relocate all spoils removed to an acceptable location and dumped at the facility. The location will be determined at the pre-bid meeting.
 - The contractor must install a scratch coarse over the existing asphalt in the front parking lot area in order to fill in any of the existing potholes and level the area prior to installing the final wearing coarse. The scratch coarse must average one-half (1/2") inches in depth. The course grade asphalt must be no. 2.
 - 6) The contractor must install two (2") inches of new no. 2 course grade asphalt overtop of the new scratch course asphalt. The thickness of the new course grade asphalt must be two (2") inches thick after rolled.

- 7) The contractor must install one and a half (1.5") inches of new wearing coat overtop of the course grade. The thickness of the new wearing grade must be one and a half (1.5") inches thick after rolled.
- 8) The contractor must slope the new asphalt toward the existing storm drains.
- 9) After the new wearing cost is installed, the contractor must paint the parking lot lines on the new asphalt.
- 10) The facility will remove any metal sign poles, signs, and concrete parking blocks (if applicable).
- 11) After the contractor has completed the work, the facility will install back the sign poles, signs, and concrete parking blocks (if applicable).
- C3: In specifications section 1.01(A), subsection 2(b), subsection 3, the previously stated has changed to the following. The yellow highlighted areas are the changes:
 - The contractor must install one and a half (1.5") inches of new wearing coat overtop of the existing asphalt after milled. The thickness of the new wearing grade must be one and a half (1.5") inches thick after rolled.
- C4: In specifications section 1.01(A), subsection 3(a), subsection 1, the previously stated has changed to the following. The yellow highlighted areas are the changes:
 - The existing intake parking lot area consists of eight (8") inches of aggregate base material and four and a half (4.5") inches of asphalt which consists of three (3") inches of base coat, and one (1.5") inch of wear coat.
- C5: In specifications section 1.01(A), subsection 3(b), the previously stated has changed to the following. The yellow highlighted areas are the changes:
 - The contractor must temporarily relocate the eight (8) existing twenty (20') feet by eight (8') feet by eight (8') feet metal storages buildings. The temporary location will be determined at the at the pre-bid meeting. Prior to temporarily relocating, the facility staff will remove all heavy items out of the metal storage building. The contractor must put the storage units back in the same location after the asphalt has been installed. Please note that the facility may request that the existing metal storage buildings be put back in a different configuration in the parking lot area.

- 3) The contractor must clean off the intake parking lot area.
- 4) The contractor must install one and a half (1.5") inches of new wearing coat overtop of the existing asphalt after milled. The thickness of the new wearing grade must be one and a half (1.5") inches thick after rolled.
- C6: In specifications section 1.01(A), subsection 4 has been moved to subsection 5 so that a new subsection 4 can be added.
- C7: In specifications section 1.01(A), subsection 4, the following has been added. The yellow highlighted areas are the changes:
 - 4. The access road outside the outer sallyport gate area:
 - a. Information on the access road outside the outer sallyport gate area:
 - 1) The existing access road area consists of eight (8") inches of aggregate base material and four and a half (4.5") inches of asphalt which consists of three (3") inches of base coat, and one (1.5") inch of wear coat.
 - There is an area that has previously been cut out to install a natural gas pipeline underneath the access road and then reinstalled.
 - 3) The existing access road is twenty-three (23') feet wide and right before the outer sallyport gate, it reduces down to twenty (20') feet wide.
 - 4) On the left hand side of the access road, the area of this project is approximately seventy-seven (77') feet from the outer sallyport gate.
 - On the right hand side of the access road, the area of this project is approximately ninety-one (91') feet from the outer sallyport gate. The reason the right hand side is long is because there is more of a curve.

- On the left hand side, there is an existing call box. It appears that there was previously asphalt against the existing call box post, but it has broken up and gravel had been installed.
- 7) At the outer sallyport gate, there are metal bollards on both the left hand and right hand sides with concrete around them. The contractor is not to mill any of the existing concrete that is around the metal bollards.
- At the outer sallyport gate, there is existing concrete underneath the sallyport gate. The contractor is not to mill any of the previously stated.
- b. Construction on the access road outside the outer sallyport gate area:
 - The contractor must mill one and a half (1.5") inches of existing asphalt of the specified dimensions previously stated. The contractor must relocate all spoils removed to an acceptable location and dumped at the facility. The location will be determined at the pre-bid meeting.
 - 2) The contractor must clean off the access road area.
 - The contractor must install one and a half (1.5") inches of new wearing coat of the existing asphalt after milled in the specified dimensions previously stated. The thickness of the new wearing grade must be one and a half (1.5") inches thick after rolled.
 - 4) The contractor must install new wearing coat asphalt against the right hand side of the metal post to the call box.
- C8: In specifications section 1.01(B), subsection 4, the following has been added. The yellow highlighted areas are the changes:
 - 4. Attachment no. 4: Pictures of the existing access road outside the outer sallyport gate area.
- C9: Please see attached attachment no. 4: Pictures of the existing access road outside the outer sallyport gate area.
- C10: The time and date the bids are due by has not changed: 10:30 AM E.S.T. on October 24, 2025

In the case of a vendor granted protection by order of a federal bankruptcy court or a vendor granted an exemption under any rule of the Bureau of Employment Programs or the Insurance Commission, the commissioner may award a contract: *Provided*, That in no event may the contract be awarded to any vendor who has not paid all current state obligations for at least the four most recent calendar quarters, excluding the current calendar quarter, or with respect to any vendor who is in default on a repayment agreement with an agency of the state;

 - 4) A repeated pattern or practice of failure to perform so serious and compelling as to justify disqualification; or
 - 5) Any other cause of a serious and compelling nature amounting to knowing and willful misconduct of the vendor that demonstrates a wanton indifference to the interests of the public and that caused, or that had a substantial likelihood of causing, serious harm to the public.

Unless the context clearly requires a different meaning, for the purposes of this section, the term:

- a. "Debt" means any assessment, premium, penalty, fine, tax, or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, amounts owed to the Workers' Compensation Fund as defined in §23-2C-1 et seq. of this code, penalty, or other assessment or surcharge presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon;
- b. "Debtor" means any individual, corporation, partnership, association, limited liability company, or any other form of business association owing a debt to the state or any of its political subdivisions, and includes any person or entity that is in employer default;

An employer is not in employer default if it has entered into a repayment agreement with the Insurance

Commissioner and remains in compliance with the obligations under the repayment agreement;

- d. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function and whose jurisdiction is coextensive with one or more counties or municipalities; and
- e. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company, or any other form of business association or other entity whatever, related to any vendor by blood, marriage, ownership, or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually, or by effect, receive or control a portion of the benefit, profit, or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

The prohibitions of subdivision (5), subsection (f) of this section do not apply where a vendor has contested any tax administered pursuant to chapter 11 of this code, amount owed to the Workers' Compensation Fund as defined in §23-2C-1 et seq. of this code, permit fee, or environmental fee or assessment and the matter has not become final, or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

The division may disqualify a vendor if award to the vendor would jeopardize the safe, secure, and orderly operations of the division.

All bids, contract proposals, or contracts with the state or any of its political subdivisions submitted or approved under the provisions of this code shall include an affidavit that the vendor, prospective vendor, or a related party to the vendor or prospective vendor is not in employer default and does not owe any debt in an amount in excess of \$1,000 or, if a debt is owed, that the provisions of subsection (h) of this section apply.

- f) Patching: Remove and replace paving areas mixed with foreign materials and defective areas. Cut out such areas and fill with fresh, hot hot-mixed asphalt. Compact by rolling to specified surface density and smoothness.
- g) Protection: After final rolling, do not permit vehicular traffic on pavement until it has cooled and hardened.
- h) Erect barricades to protect paving from traffic until mixture has cooled enough not to become marked.

 - 1. Before work each day at the job site, everyone from the design firms, contractors, and subcontractors will be required to sign-in. This is to have accountability to know exactly how many individuals and who is at the DCR facility in the event something that would happen.
 - 2. All design firms, contractors, and subcontractors will receive a security orientation prior to working on site if applicable at the DCR facility.
 - 3. All design firms, contractors, and subcontractors will be issued a temporary ID if applicable at the DCR facility and it must be surrendered at the end of each workday. All design firms, contractors, and subcontractors will be required to turn in federal or state issued photo ID each day if applicable at the DCR facility before they can pick up a

- temporary ID. The federal or state issued photo ID will be returned at the end of the work when the temporary ID is returned to the DCR facility.
- 4. It is the design firms, contractors, and subcontractors responsibility to notify the DCR facility as much in advance of any deliveries. All contractors and subcontractors must give a minimum of twenty-four (24) hours of advance notice.
- 5. There are a lot of inmates that are out and about at the DCR facility grounds. Design firms, contractors, and subcontractors are not permitted to socialize or mingle with inmates or give them any items. For example, tobacco products, knives, tools, cell phones, etc.
- 6. The introduction of contraband, for example, weapons, drugs, alcohol, cell phones, etc., will result in prosecution.
- 7. All design firms, contractors, and subcontractors are subject to be searched, at any time, via pat-down, use of the special operations, or the K-9 unit.
- 8. All design firms, contractors, and subcontractors vehicles are subject to be searched at any time.

- 10. All design firms, contractors, and subcontractors are to remain in their work areas unless an emergency dictates otherwise.
- 11. All design firms, contractors, and subcontractors must stay in the same area as their escort. If any individual or individuals do not comply, they will be escorted off the DCR facility property and could potentially not be allowed back on site.
- 12. No design firms, contractors, or subcontractors are permitted to have cell phones at the DCR facility buildings or inside the perimeter fence areas. All individuals must leave their cell phones locked up in their vehicle. The contractor's field superintendent or foreman may use their cell phone, but is at the discretion of the DCR, and will be handled as a case-by-case scenario.
- 13. The DCR facility has a certain designated smoking area outside the perimeter fence. That is the only area that is permitted to use tobacco products. Tobacco products are not permitted inside any of the buildings or anywhere inside the perimeter fenced in area.
