Any individual that does attempt to represent two or more vendors will be required to select one vendor to which the individual's attendance will be attributed. The vendors not selected will be deemed to have not attended the pre-bid meeting unless another individual attended on their behalf. The required attribution of attendance to a single vendor should be addressed during the pre-bid but may occur at any time deemed appropriate by the Agency.

An attendance sheet provided at the pre-bid meeting shall serve as the official document verifying attendance. Any person attending the pre-bid meeting on behalf of a Vendor must list on the attendance sheet his or her name and the name of the Vendor he or she is representing.

All Vendors should arrive prior to the starting time for the pre-bid. Vendors who arrive after the starting time but prior to the end of the Prebid will be permitted to sign in but are charged with knowing all matters discussed at the Prebid.

Questions submitted at least five business days prior to a scheduled pre-bid will be discussed at the pre-bid meeting if possible. KODAK ACHIEVE
T400/T800 PLATESETTER

Stability and reliability, plus incredible value

Exceptional quality and value

The KODAK ACHIEVE T400/T800 Platesetter delivers the stability and reliability of Kodak's thermal CTP technology at exceptional value, enabling you to provide print quality that differentiates you from your competition.

This robust external-drum thermal CTP device has been specifically designed for the demanding needs of general commercial and publication printers. With a small footprint that minimizes space requirements, the ACHIEVE Platesetter meets international ergonomic standards for easy access and minimal physical effort, and offers reliable plate making of up to 22 8-page plates per hour. Affordable automation options meet your business needs and help drive maximum productivity, flexible resources and reduced labor costs.

New features, such as more automation and significant power savings, make the latest ACHIEVE Platesetters a smart investment for your business.

Advanced automation

Automating prepress production helps reduce waste and costly errors while optimizing throughput and efficiency. The ACHIEVE T400/T800 Platesetter is available with a variety of automation options to meet a wide range of business needs.

Semi-Automatic (SA)

Standard. Semi-automated plate loading and unloading.

Auto Unload (AU)

Semi-automated. Manual loading, automatic unloading to plate processor or stacker; optional automatic plate rotation.

Autoloader (AL)

Automated plate loading and unloading of up to 80 plates without slip sheets (0.3 mm); optional automatic plate rotation.

Single Cassette Unit (SCU)

Fully automated; holds up to 120 plates (0.3 mm) of the same size and thickness with slip sheets. Optional automatic plate rotation.

Multi-Cassette Unit (MCU)

Fully automated; holds up to 480 plates (0.3 mm) in 4 cassettes, each containing up to 120 plates of the same size and thickness with slip sheets, enabling up to 4 different plate sizes online. The required cassette is automatically selected according to the job definition. Standard: 2 cassettes. Optional 4 cassettes total. Optional automatic plate rotation.

Manual bypass

Available with AL, SCU and MCU; increases flexibility and uptime by allowing an operator to bypass automation to quickly remake a plate or make a set of plates of a size not loaded into the cassette.

Inline punch

Available with AU, AL, SCU and MCU; optional inline punch with up to 10 punch heads, as part of the engine automation, delivers a press-ready plate.

Increase productivity and growth

The Multi Cassette Unit offers automated plate loading and unloading of up to 480 plates, so you can run continuously for longer. You can also have up to 4 different plate sizes online, further improving efficiency and productivity. Or you can choose from several other automation options, from Semi-Automatic to a Single Cassette Unit, to support your unique business needs.

Reduce your environmental footprint

In addition to being fully compatible with SONORA Plates with throughputs of up to 28 4-page plates per hour, letting you completely eliminate the environmental impact of processing, the ACHIEVE Platesetter has a new cooling system that reduces power consumption to only 400 watts while imaging, a savings of up to 43% from previous models and up to

95% compared to some competitor CTP devices. The platesetter's small footprint reduces shipping waste and costs, and the MCU is up to 65% smaller than comparable MCU solutions.

Superior imaging technology

ACHIEVE Platesetters feature Kodak's light valve technology in its TH5 thermal head, which delivers higher quality than the Gaussian technology used in other vendors' CTP devices. The TH5 head images a more precise, accurate dot, leading to higher tonal stability and exposure uniformity. With no moving parts, the TH5 thermal head also delivers outstanding robustness and is simple to service and maintain.

New app for remote monitoring

The new, optional, KODAK Mobile CTP Control App lets you monitor your ACHIEVE T400/T800 Platesetter remotely with your Android or IOS device. Know instantly if one of your CTP devices needs attention, even if you are out of the room or off site, so you can get back to making plates quickly.

The ACHIEVE T400/T800 Platesetter is fully compatible with SONORA Process Free Plates.
